

End profile corruption. Retain system security and stability. Maintain administrative control over your network environment.

Lessen the time you spend on lengthy and frustrating support calls by keeping users satisfied with a stable desktop environment while providing a continuously fast database connection.

Use Simplify Profiles®.

triCerat provides the crucial middle ground between profile security, system manageability, and a predictable user workspace that can be saved from one session to the next.

Hybrid Profile - The Best of Both Worlds

Eliminate the problems caused by stubborn roaming profiles by implementing a program that gives you the best of both worlds: mandatory profiles that allows users to customize and save their business workstation as if they were using roaming profiles.

Simplify Profiles allows you to set and maintain the application details that users need to efficiently work throughout the day, enabling you to control, manage, and protect your registry settings and user profiles with ease. Control all application registry entries at logon and logoff using a single, point and click control console.

Features

- Registry Configuration and Management
- Profile Management
- Policy Manager
- triReg
- RegDif
- Roaming Profile Migration Wizard Registry Change Wizard

Benefits

- Improves system stability and reliability
- Speeds log-on time
- Enhances user satisfaction
- Saves administrative time and effort
- Reduces support cost

"We implemented mandatory user profiles to maintain strict audit controls, but user complaints about the lack of flexibility were a real issue. Simplify Profiles allow us to maintain our standard profiles while giving specific groups of users the personalized environments they required."

— Steve J, Senior Network Engineer, Fortune 500 Pharmaceutical Company
